

Dentist Clinic stock program:

this project is for a dentist clinic who asked me to create a program that will help track her stock. This is just the first sketch I made after having a conversation with the clinic owner.

I will update in each change

Main App page:

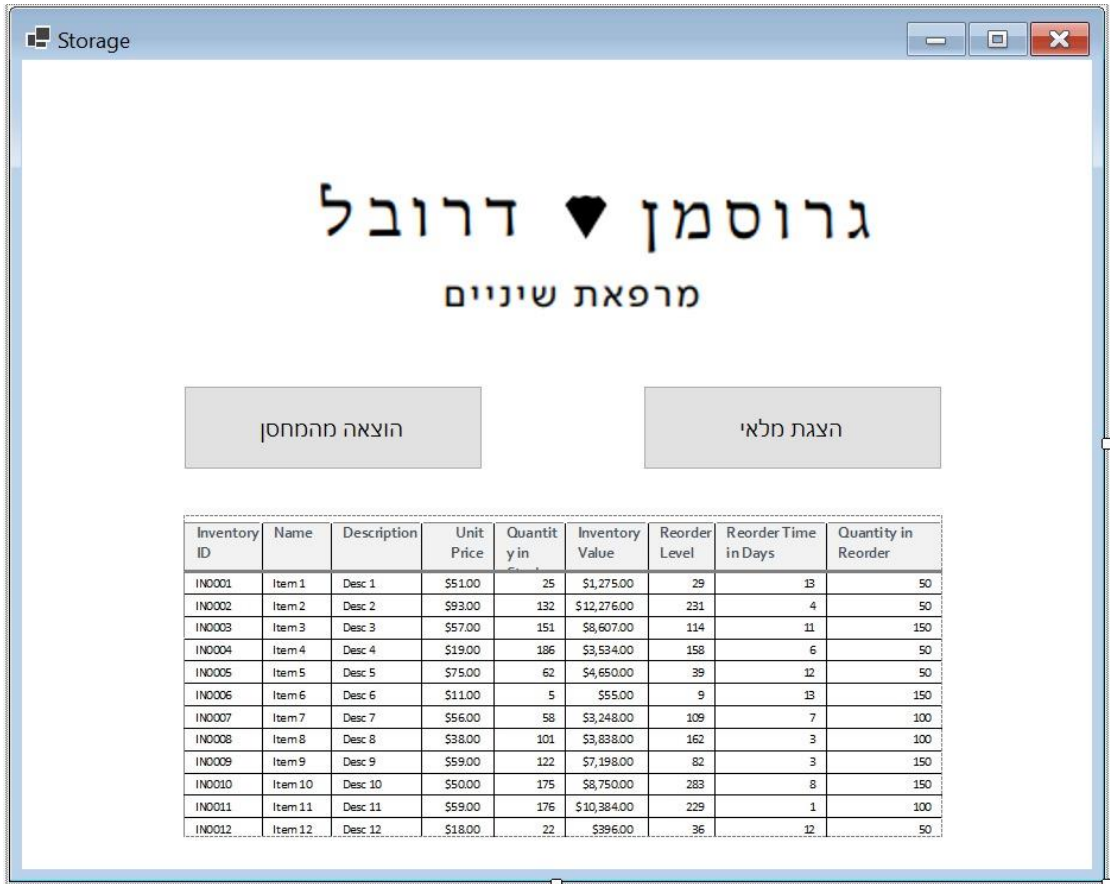

A screenshot of a Windows application window titled "Grossman Dental Clinique". The window has a standard Windows title bar with minimize, maximize, and close buttons. The main content area displays the clinic's name in Hebrew, "גרוסמן ♥ דרובל", followed by "מרפאת שיניים" (Dental Clinic). Below this, there are six gray rectangular buttons arranged in two rows of three. The buttons are labeled: "חדר 1" (Room 1), "מחסן" (Storage), "חדר 3" (Room 3) in the top row, and "חדר 2" (Room 2), "דוחות" (Reports), "חדר 4" (Room 4) in the bottom row.

Each room page :

A screenshot of a Windows application window titled "Room1". The window has a standard Windows title bar. The main content area displays the clinic's name in Hebrew, "גרוסמן ♥ דרובל", followed by "מרפאת שיניים" (Dental Clinic). Below this, there are several input fields and dropdown menus. On the left, there are three empty text boxes, each followed by the label "כמות:" (Quantity:). On the right, there are three dropdown menus, each followed by the label "שם המוצר:" (Product name:). The first dropdown menu is currently set to "1 מוצר" (1 product). At the bottom left, there is a gray button labeled "שלח" (Send).
